

The Brome Lake Bathymetric Map is under Revision

2012/10/08 by R.L.B.

During the week of August 6, 2012, a team from ministry of the environment (MDDEP) spent three days crisscrossing Brome Lake to gather the necessary data to revise the lake's bathymetric map. The current map dates back to 1969 and all the data related to the depth has probably changed over the years.

revealed between now and the end of the year.

The new map, to which will be added the GPS points and the various depths, will be
