

## Reporting abnormal situations regarding fish

2014/07/25 by R.L.B.

In mid-June, an unusual amount of dead fish were spotted on the lake. Several hypotheses have been studied. In retrospect, it does not seem that there were any safety issues for swimming or for the consumption of fish. The authorities of Public Health issued no warning or public health notice. The cause of the mid-June episode remains undetermined even after the analysis of several hypotheses. Evidently, the usual rules of safety are required.

If you witness a similar situation: unusual mortality, anomalies, abnormal behavior, fish diseases, the procedure to follow is as follows:

- Take a photo or photos of the situation;
- Contact RBL: [info@renaissancelbl.com](mailto:info@renaissancelbl.com) or 450-242-2784 (leave a message);
- Specify the maximum amount of information: date and location, number, species, fish condition;
- RBL will contact the appropriate Ministry and will need to take one or more specimens, as deemed necessary.

In case of illegal activities, communicate with SOS Poaching 1-800-463-2191.
