

Shoreline at Coldbrook Park: congratulations to TBL!

2014/07/04 by R.L.B.

Citizens have noticed the recent sodding of Coldbrook Park. Even if it is a temporary arrangement until the Blackwood dam is renovated, the work will be much appreciated now.

Renaissance Brome Lake (RBL) acknowledges the Town and their service of Land and Environment Management (GTE) for the development of the shoreline, 10 meters along the Coldbrook Creek. The vegetated cover that was installed is an environmental gain for runoff management

and biodiversity.

Compliance with the shoreline regulations around the lake and along the river is often reminded to citizens and it is important that the City provides an example.

Obviously, this situation creates usage constraints with which it must deal with. Most people understand the value of a natural shoreline, though some still ignore it's importance. Congratulations to the Town!
